Brass, Iron, or Bronze.

## TERMS, &amp;c.

THE READY MONEY DISCOUNT, 5 per Cent., is allowed when Goods are paid for on or before delivery, or (where there is a current account) within one month of that time.

2½ per Cent. is allowed when Goods are paid for within three months of delivery.

After this the charges are Net, and 5 per cent. Interest is charged on any accounts which are owing outstanding.

NOTICE TO NEW CUSTOMERS.—Country and Foreign Orders for goods will have every attention; but new customers are requested to transmit, with the order, a reference to a friend or firm in London, or a banker's cheque or Post Office order for the amount.

Goods for Exportation must be paid for before they are shipped.

PACKING.—Packing is charged at cost price. Two-thirds allowed for packages when actually received free of carriage and in good condition.

ESTIMATES WILL BE FURNISHED, on application, for any of the various works referred to and described in this Catalogue.

PRACTICAL PERSONS SENT to any part to take dimensions, or to fix the work, when required.

BENHAM AND SONS' CHANNEL VALVE SHOWER BATHS,

With Spring Stop, Jephson's Tubes, &c., &c., £7 10 0.

The great annoyance frequently experienced in all Shower Baths from the dropping of water during the night (which no caution in their manufacture has been hitherto able entirely to prevent), is now, by the Channel Valve, effectually remedied. The smallest particle of hair, straw, or sand, lodging itself in the valve, was sufficient to cause this evil, or the more hideable one of water dropping on the bather on entering the bath before the descent of the shower.

By the Spring and Stop, the valve on being pulled remains open, and the Bather's hands are both at liberty for rubbing himself. By pulling the spring the shower is instantly stopped, or as instantly resumed.

By the use of Dr. Jephson's tubes the force of the shower is much increased.

# LAVATORY TABLES,

With (or without) hot and cold services and waste.

The central compartment in the top of the table is of earthenware, made entirely in one piece, which is set into a slab of marble or enamelled slate.

The other parts of the table may be of French polished mahogany, or any other wood, to correspond with the furniture in the room.

Price, including Apparatus for Hot, Cold, and Waste, with china knobs, &c. ....£25 0 0

A less expensive form is made, as shown in the lower engraving.

Price, with hinged Cover and Looking-glass, and with Apparatus for Hot, Cold, and Waste, China Knobs, &c. ....£12 10 0

Ditto, without the hinged Cover and Looking-glass, and without the Apparatus for Hot, Cold, and Waste .. ...£7 10 0

THE PRICES ARE SUBJECT TO A PER CENT. DISCOUNT FOR READY MONEY

## WARM BATHS.

Fitted up with panelled wood enclosure, with hot and cold services and waste.

The hot and cold water are admitted by means of the lever handles at the end, and the Bath is afterwards emptied in a similar manner. The hot water may be supplied either from the boiler of the Kitchen Range, or from a fire in the Bath Room, or from a distinct furnace.

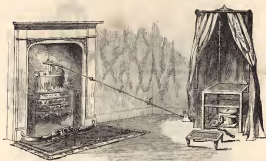

A SHOWER BATH can also be fitted up over it, as represented above, with the hot and cold water laid on.

## HOT WATER SUPPLY TO NURSERIES, BEDROOMS, &c.

A CONSTANT SUPPLY OF HOT WATER may be provided for NURSERIES, BED ROOMS, DRESSING ROOMS, BATH ROOMS, or any parts of the house, by means of pipes from the boiler of the Kitchen range, and without in any way interfering with the kitchen arrangements.

The advantages of this plan, and the saving of time and labour which it effects, are too evident to require any further explanation.

# PORTABLE VAPOUR BATHS.

IMPROVED PORTABLE VAPOUR BATH, with copper boiler, copper pipes, copper dispenser, &c.; seat, footstool, and curtains.

The whole packed in a wood case, with lock and key, £10 10 0.

N.B. A smaller and cheaper apparatus is made, and without the seat and footstool, price £5 5 0

## PORTABLE HOT AIR (OR VAPOUR) BATHS.

Black Tin.

Copper, 30/6

Tray for Sulphur or Mercury 6/0 extra.

These Baths can be used by a person in bed or on a chair, and also to the whole or any part of the body with equal facility. ## GAS FITTING.

The increasing and almost universal use of Gas renders it unnecessary to explain its advantages over candles and oil, especially for lighting halls and staircases, kitchens, servants' offices, passages, stables, &c.

It is more cleanly and economical, avoids risk of fire, and gives no trouble.  
Gas is also now very frequently introduced into dining rooms and drawing rooms.

LAMP PILLARS.

## RICKETS'S VENTILATING GLOBE-LIGHTS.

PATTERN C.

PATTERN E.

PATTERN L.

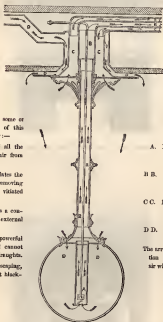

A descriptive pamphlet, with  
prices and full particulars,  
sent on application.

The Ventilating Globe-Light  
may be seen in operation at  
BENHAM & SONS' Show  
Rooms.

# RICKETS'S VENTILATING GLOBE-LIGHTS.

## DESCRIPTION.

The following are some of the advantages of this mode of lighting:—

I.—It carries off all the heat and foul air from the burner.

II.—It also ventilates the apartment, by removing the heated and vitiated air.

III.—It introduces a constant supply of external fresh air.

IV.—The flame is powerful and steady, and cannot be affected by draughts.

V.—No smoke escaping, the ceiling is not blackened.

A. Burner, and Gas Pipe to supply the same.

B B. Pipe to carry off the foul air from the burner.

C C. Pipe to carry off the heated air of the room.

D D. Inlet for cold external fresh air.

The arrows show the direction of the currents of air when in operation.

With this arrangement, Gas may therefore now be introduced into Drawing Rooms, Dining Rooms and Libraries, without any risk of damage to the decorations, furniture, pictures, or books and the injurious effects on the health are also entirely avoided.

THE PRICES ARE SUBJECT TO 5 PER CENT. DISCOUNT FOR READY MONEY

## STOVES AND FENDERS.

A selection has been made which it is hoped will assist those who cannot conveniently pay a personal visit to the Show Rooms.

It is impossible, however, within the limits of this Catalogue, to give an adequate idea of the great variety of patterns in the stock.

With ascending or descending Flues.

Price from 30/3.

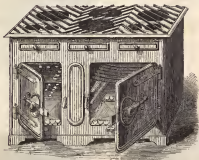

THE PRICES ARE SUBJECT TO 5 PER CENT. DISCOUNT FOR READY MONEY.

## GAS COOKING APPARATUS.

No. 1. For boiling water, &c.  
7/6 and 10/0.

No. 5. For boiling or stewing at top, and  
frying or roasting underneath,  
15/0, 20/0, and 25/0.

No. 3. For baking, roasting, boiling, stewing, broiling, and steaming, either  
separately or together, £18 6 6.

The use of gas for cooking has the advantage of affording a steady uniform heat at any temperature, for any length of time, without attention or supervision.

Being always ready for use, the gas need not be lighted until it is actually required, and can afterwards be extinguished immediately.

There is but little waste of heat, so that the temperature of the room is but slightly increased.

THE PRICES ARE SUBJECT TO 5 PER CENT. DISCOUNT FOR READY MONEY.

# GAS COOKING APPARATUS.

No. 4. Small Apparatus, suitable  
for a small number of persons,  
20 in. high, 12 in. wide, 15 in.

high, 20 in. wide, 15 in. deep,  
price ..... £11 0 0

No. 6. Gas Hot Closet, with folding doors,  
and heated by a very small quantity of Gas.  
This can be placed in a kitchen, dining-room,  
bath-room, or passage, as may be most con-  
venient.  
Price from £7 to £15, according to size.

THE PRICES ARE SUBJECT TO 5 PER CENT. DISCOUNT FOR READY MONEY.

T

## FLAVEL'S PRIZE KITCHENER,

*With Patented Improvements,*

To which a Prize Medal has been awarded at the International Exhibition, 1862; also the only Kitchen Range which obtained a Prize Medal and Special Approbation at the Great Exhibition, 1851.

These Ranges are strongly recommended for their simplicity of construction, and their economy and cleanliness in use.

They are made from three to eighteen feet in width, suitable for large or small establishments, and may be arranged to supply a Bath, Steam Kettle, Stearn Closets, &c.

They are a certain cure for Smoky Chimneys.

No. 1, A.

This Range is made from 3 feet to 5 feet wide, and consists of a Hot-plate, whereon boiling, stewing, &c., may be done without injuring and soiling the vessels in use, and which may also be used as an Ironing Stone. Wrought-iron Raster on one side of the fire, with movable shelves, double Drip-pans and Mini-stand, thoroughly ventilated by means of air tubes and valves (by closing which the Raster becomes an excellent oven). Small iron side Raster, on the other side of the fire, with steam-pipe and brass tap, Grid-iron, for broiling. Ash-pans, back, key, and roller; dampers, register door, &c.

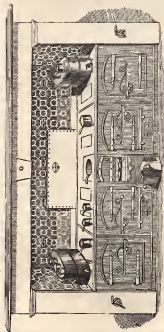

No. 4, B.

This Range is made from 4 feet to 6 feet wide, and consists of a Hot-plate whereon boiling, stewing, &c., may be done without injuring and soiling the vessels in use, and which may also be used as an Ironing Stone. Wrought-iron Oven on one side of the fire, with movable shelves, double Drip-pans, and Mini-stand, thoroughly ventilated by means of air tubes and valves (by closing which the Raster becomes an excellent additional Oven). Small wrought-iron back Raster, with inlet and outlet pipes, and brass tap. Grid-iron, for broiling. Ash-pans, back, key, and roller; dampers, register door, &c.

FOR PRICE LIST SEE PAGES 148 & 149.

FLAVEL'S PRIZE KITCHENER.

No. 84

This Range consists of a Hot-plate, whereon boiling, stewing, &c., may be done without injuring and soiling the vessels in use, and which may also be used as an Ironing Stone. Two wrought-iron Roasters, with removable shelves, double Dripping-pans, and Meat-stands, thoroughly ventilated by means of air tubes and valves, by closing which the Roasters become excellent Ovens. Two wrought-iron Hot Chaises, with removable shelves. Strong wrought-iron back Boiler, with inlet and outlet pipes, and brass top. Griddles, for broiling. Ash-pans, hook, key, and rake. Dampers, register door, &c.

Nine Feet wide, price (as described above) £40 0 0.

They are also made with Galling or Boiling Stones at the end, if required.

THE PRICES ARE SUBJECT TO A PER CENT. DISCOUNT FOR READY MONEY.

Hot Water to a Bath, or for heating a Steam Chest and Steam Kettles; the ordinary Boilers  
purposes.

\* can be supplied at 2 or 3 days' notice.

## BENHAM'S PATENT IMPROVED VENTILATING KITCHENER.

It requires no Brickwork to fix it.

It Heats, Bakes, Boils, and Steams with One Fire, and supplies a Bath if required.

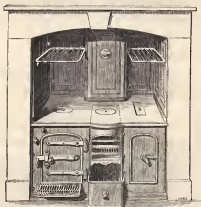

It carries off the Heat and Smell of the Kitchen.

It is a Certain Cure for Smoky Chimneys.

It can be fixed in its place in a few hours, after the Fireplace is cleared out and prepared for it, and by Local Workmen, if preferred.

It can be Removed, when required, in the event of a Change of Residence, being quite Detached and Independent.

It is not more expensive than the ordinary Kitcheners; whilst the cost of fixing is greatly diminished.

No. 22, B.

This Range is made from 3 feet to 5 feet wide.—It has a Wrought-iron Roaster on one side of the fire, with moveable shelves, double Dripping-pan and Meat-stand, thoroughly ventilated by means of air tubes and valves (by closing which the Roaster becomes an excellent oven). Strong wrought-iron side Boiler, on the other side of the fire, with steam pipe and brass tap. Gridiron for broiling. Ash-pan, back, key and raker; dampers, register door, &c.

The top consists of a Hot-plate, on which boiling, stewing, &c., may be done without injuring and soiling the vessels in use, and which may also be used as an Ironing Stove.

KITCHEN RANGES, &c.

No. 1. Back-boiler Stove. Made from 2 ft. to 3 ft. wide. Price from 30/0 to 40/0.

No. 2. Self-acting Cottage Range with oven and boiler. Made from 2 ft. 6 in. to 3 ft. 8 in. wide. Price from 50/0 to 75/0.

No. 3. Improved London Pattern Kitchen Range, with wrought iron oven and wrought iron boiler, bright sliding splashes, &c. Price from £18.

The Oven is so arranged as to be properly heated all over by the fire of the Range, and is always ready for immediate use.

The Boiler is available for supplying steam to a hot closet and steam bottles, and can also be arranged to convey hot water to any part of the house.

"." This will be found a most useful and serviceable Kitchen Range, and is one which BENHAM AND SONS can highly recommend.

The Sticks Jack represented in this engraving is less expensive than the one shown at No. 4, but is not so well finished or complete.

THE PRICES ARE SUBJECT TO 4 PER CENT. DISCOUNT FOR READY MONEY.

## KITCHEN RANGES, &amp;c.

2 ft. 1 in. high, price £3 15 0.

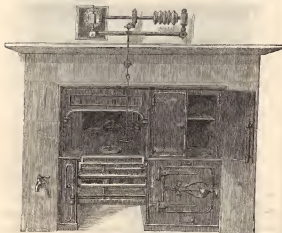

Larger size, 2 ft. 6 in. by 1 ft. 6 in.,

2 ft. 9 in. high, price £7 15 0.

No. 5. Self-cooking Range, with oven and back-boiler.

Price from £4 10 0 to £12 10 0.

No. 6. Improved London Pattern Kitchen Range, similar to No. 5, with the addition of an enclosed hot closet over the oven. Price from £15.

Hot outside-movement Snake Jack, with gun-metal bevelled cog wheels, change apparatus, &c.

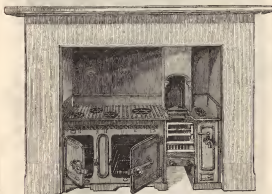

THE PRICES ARE SUBJECT TO 5 PER CENT. DISCOUNT FOR READY MONEY.

KITCHEN RANGES, &c.

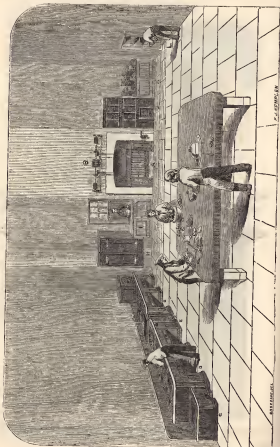

No. 7. Self-acting Kitchen Range, with oven and boiler.

This Range is of an intermediate quality between No. 3 and No. 5. It is not so strong or complete as No. 3, but is superior to No. 5. Price from £8 0 0.

No. 8. Range, with back boiler, and gas stoving stoves. The Oven and Roaster are also heated by gas. Price from £22 0 0.

## KITCHEN APPARATUS No. 1.

## DESCRIPTION OF KITCHEN APPARATUS No. 1.

A.—THE OXFORD ROASTING RANGE, the first specimen of which, in London, was introduced by BENHAM AND SONS at the celebrated Kitchen of the Reform Club, and which, with the whole of the Cooking Apparatus, was fitted up by them under the superintendence of the late M. Sayer.

It has an open fire, with vertical bars instead of the ordinary horizontal ones, but its peculiar excellence consists in the intense heat radiated from it, and its great economy of fuel—the space from the hearth to the back being only one half the usual depth. The back is formed of Stourbridge fire clay. The size of the fire may be increased or diminished at pleasure, and the whole of the front opens on hinges, like a gate, so as to give ready access for the removal of cinders, &c. The boiler for hot water is placed behind the back.

B.—IMPROVED SMOKE JACK, with double movements, double spits, and universal joints; equally applicable to any other description of Range. The apparatus is kept in motion solely by the upward current of air in the chimney, without springs or weights.

C. D.—STEWING SPOON AND STOCKPOT STOVE, heated by charcoal or Gas, and therefore requiring no fire. The lower stove at the end is for large stockpots. They are considered by many professed cooks as quite indispensable.

E.—BAIN-MARIE PAN, for keeping sauces, soups, gravies, &c., always hot and ready for use without the slightest risk of burning or spoiling.

F.—COOK'S SINK, with water for cooking purposes, &c., built on. A great saving of time and trouble in large establishments.

G.—HOT-PLATE AND BRILLING STOVE, with moveable gridiron, to which can also be added the OVEN on THE TOP, as shown in the drawing, all heated by one fire. The top and top and front are all of iron, and the draught can be regulated by the sliding doors in front.

H.—HOT CLOSET, heated by steam or hot water, for keeping silver and china hot and ready for use; also for receiving the different courses of a dinner after being dished up until taken to the dining room. By this means, joints, &c., are kept thoroughly hot, without any risk of being scorched or dried up.

I.—STEAM TABLE for dishing up. By means of the Service-window shown in the drawing, the Servants need not come into the Kitchen to carry up the dinner.

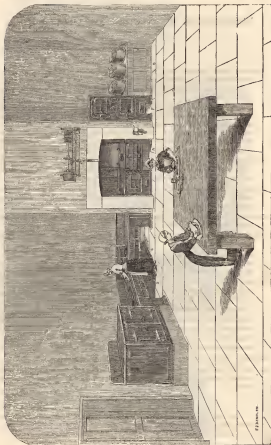

J.—OVENS, with a separate furnace underneath, and preferred by many professional cooks to those which are heated by the fire of a kitchen range.

K.—STEAM KETTLES, of Copper or Black Tin, for boiling Meat, Vegetables, Puddings, &c.

L.—LIFT for conveying the dinner to the floor above. In large establishments, cooks, &c., are carried up to the top of the building in this manner, which effects a great saving of labour.

BENHAM AND SONS will be happy to furnish Plans and Estimates for fitting up Kitchens, Sculleries, Larders, Still-rooms, Confectioneries, &c., in London or the country, and to send practical persons to take the necessary dimensions and other particulars.

## KITCHEN APPARATUS, No. 2.

## DESCRIPTION OF KITCHEN APPARATUS No. 2.

---

The Engraving (page 160) represents a very complete and efficient Cooking Apparatus, which BENHAM AND SONS can confidently recommend for London or country houses, although on a much smaller scale than that which is represented in the preceding Engraving.

- A.—BENHAM AND SONS' Improved London-pattern Kitchen Range, with oven and boiler; all heated by gas fire. The oven can be thoroughly depended upon for acting properly, and the boilers can be arranged to supply hot water for a bath, or for nursery and bedroom use (in addition to the kitchen), as well as to heat a hot closet and steam kettles, as represented in the Engraving.
- B.—IMPROVED SMOKE JACK, with single movements, dangle-eye, and universal joint.
- C.—HOT-PLATE and BRILLING STOVE, with iron front and top, moveable grilliron, &c.
- D.—STEWING STEVES, heated by charcoal or gas.
- E.—HOT CLOSET, heated by steam, for keeping silver and china hot, and ready for use; also for warming the different courses of a dinner after being dished up, and until taken to the dining room, without any possibility of their being scorched or dried up.
- F.—Ovens, with a separate furnace underneath.
- G.—STEAM KETTLES, for boiling meat, puddings, vegetables, &c.
- 

BENHAM AND SONS will be happy to furnish Plans and Estimates for fitting up Kitchens, in London or country, and to send practical persons to take the necessary dimensions and other particulars.

## BENHAM'S PATENT COOKING APPARATUS,

For Boiling, Roasting, Stewing, Broiling, Steaming, Baking Bread and Pastry,  
 &c., and supplying Hot Baths, FOR LARGE NUMBERS,  
 WITH A SINGLE FIRE.

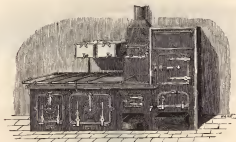

The Special Advantages of this Apparatus are:—Remarkable Economy of Fuel; Simplicity of Management; Perfect Control; and great External Coolness. The following examples, amongst others, may be referred to:—

WHERE IN OPERATION.	NUMBER OF COOKS FOR.	DAILY AVERAGE CONSUMPTION OF FUEL.

## BENHAM'S PATENT COOKING APPARATUS.

(Pattern K.)

This Apparatus consists of 4 Ovens, one Hot Closet, large Hot Plate, Hot Water and Steam Boiler, Steam Kettles, &c. The whole heated by a Single Furnace.

This Pattern is extensively adopted by the PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY, and cooks for 200 Saloon Passengers.

(Pattern M.)

This Apparatus contains two Ovens for Meat, Pastry, &c., a Meat Boiler, Water Boiler, Steamer, Hot Plate, and Furnace, the whole very compact in bulk and very simple in its management.

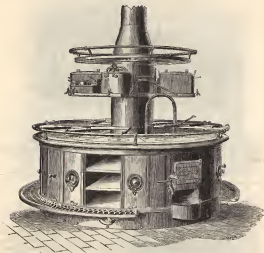

This pattern is adopted by the PENINSULAR & ORIENTAL STEAM NAVIGATION COMPANY for the Crew's Cooking, in their Passenger Vessels.

The same principle is adapted for Small COUNTRY UNIONS and PUBLIC INSTITUTIONS.

THE PRICES ARE SUBJECT TO 5 PER CENT. DISCOUNT FOR READY MONEY.

## BENHAM'S PATENT COOKING APPARATUS.

(Pattern O O.)

This Apparatus contains two Roasting Ovens, two Pastry Ovens, two Hot Closets, a Broiling Griddle, Large Hot Plate, Steam and Hot Water Boiler, four Steam Kettles, two Bain-Marie Pans, Rack Shelf for Stewpans, two Furnaces, two Ashes Pans, &c.

It stands in the middle of the room, so as to give easy access to every part; the oven doors slide round in grooves, so as to prevent the loss of room involved in the use of hinged doors; the position of the Steam Boiler, Bain-Marie Pan, and Steamers is specially convenient for the Cook. The consumption of Coal is exceedingly moderate.

It is capable of Cooking for about 300 persons, and has been adopted by the ROYAL NAVAL STEAM PACKET COMPANY for their new ships.

It is also well adapted for PUBLIC INSTITUTIONS AND RESTAURANTS, and only occupies a floor space of about 7 feet diameter.

THE PRICES ARE SUBJECT TO 5 PER CENT. DISCOUNT FOR READY MONEY.

# PORTABLE STEWING STOVES.

No. 1. With enclosed body and sliding ash-drawer, 2 feet by 1 foot 6 inches, £4 10 0.

No. 2. 4 feet by 2 feet...£9 15 0.

## BUTTER CHURNS.

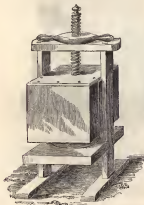

The Beater is of the form found by experience to be best calculated for agitating the cream, forcing it through the strands incorporating the Oxygen with it more perfectly, and producing good, sound Butter, more speedily and of better quality than that effected by any other Churn. As the Beater comes out readily, it can be THOROUGHLY CLEANSED with little trouble, and warmed or cooled by the most simple means, as the season of the year or the climate may require. These Churns are made of well-seasoned white wood.

### SIZES AND PRICES.

4	6	8	10	12	14	20	25	quarts of cream, or pounds of Butter.
£1 10 0	1 15 0	1 18 0	2 2 0	2 5 0	2 10 0	3 0 0	3 15 0	

## IMPROVED CHEESE PRESS.

This compact and durable apparatus will be found very efficient for the purpose intended, and is not liable to derangement. It is substantially made of well-seasoned wood. The box can be weighted with stones, and by turning the nut or handle the weight is raised or lowered.

It will take in a cheese measuring twelve inches across.

PRICE, £3 10s. 6d.

Larger sizes made to order.

## HOT WATER APPARATUS,

For warming Churches, Chapels, and Public Buildings; Halls, Staircases, and Private Houses; Conservatories, Greenhouses, Forcing Pits, &c

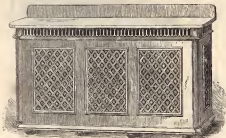

The use of Hot Water Apparatus, for diffusing artificial heat, has now become general, and its merits are universally acknowledged.

It is perfectly safe, free from any unpleasant smell, and may be efficiently managed by any person of ordinary intelligence.

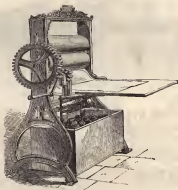

The hot water circulates through iron pipes. The whole of the water in the apparatus passes successively through the boiler, and communicates the heat which it thus receives from the fuel, to the various buildings and apartments where the warmth is required. There are no buildings, however large, to which it cannot be advantageously adapted.

The arrangements vary greatly, according to the nature and construction of the building. For halls and staircases, pedestal-cases are frequently used, as represented above, which may be enclosed by an ornamental wall enclosure, surmounted by a marble slab, as shown by the following engraving.

The pipes may also be placed out of sight, and the warm air introduced through the floors or skirtings of the apartments.

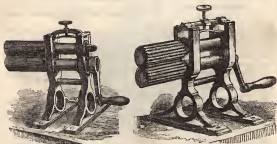

MANGLES.

## IMPROVED HYDRAULIC RAM.

THE IMPROVED SELF-ACTING WATER RAM, is peculiarly adapted for raising water out of valleys or low grounds, or from the banks of a river or running stream, to the top of the adjoining hills or high grounds, for supplying meadows, houses, and farm yards, ponds, reservoirs, &c. It works day and night, without any attendance or expense, after it is once fixed. It is necessary to have a fall of water to work it, and the greater the height of the fall, the more effective will be the machine. The greater the height of the lift, of course the less will be the quantity raised in a given time.

Persons who have small running streams on their estates, and require water to be raised to the tops of their houses or other buildings, may be furnished with estimates of the expense of obtaining it, by giving the following information:—

1st. The number of feet fall they can obtain at the spring or brook to work the Ram.

2nd. The perpendicular height from the lower part of the fall to where the water is required to be delivered.

3rd. The distance, horizontally, from the spring or brook to the house or premises where the water is required.

4th. If the spring or stream should be small, it is very desirable to ascertain how many gallons it flows per minute.

The Hydraulic Ram cannot be applied to stagnant waters—a fall is absolutely necessary—but if the spring or brook have not a dam-head already, one may be constructed in most situations at a small outlay.

The price of these machines is from £10 10s. to £30, according to their size and power.

4 "	..	..	10 0 0

The above Pumps are for Wells not exceeding 25 feet in depth.

## PUMPS.

OVERCAST COPPER WATER WHEEL, in cast-iron Frame, working three small force pumps, for raising water for the supply of gentlemen's houses, farm buildings, or large establishments; it may be fixed in any situation where a small but constant supply of water can be obtained either from a spring or river; the quantity of water pumped up, and the height to which it may be raised, will depend on the number of gallons per minute running on the wheel, and the height of the fall. The machine may be readily fixed by any plumber, requiring only to be hoisted down to an oak sill, and the making of two joints. It will work day and night without attention, and is not liable to get out of order; a trifling expense for oil will keep it in repair for years.

No. 7. Cast-iron Frame, with a 5 ft. 6 in. tinned copper water wheel, 10 inches wide, with a wrought-iron three-throw crank, 5 in. stroke, with three 1½ in. force pumps, and copper connecting cistern on top of barrels. ....	£24 0 0
No. 7, A. Ditto, Wheel 15 in. wide. ....	60 0 0
No. 7, B. Ditto, Wheel 4 ft. diameter, 15 in. wide, 5 in. stroke. ....	40 0 0
No. 7, C. Cast-iron Frame, with a 5 ft. 6 in. galvanized iron water wheel, 15 inches wide, and a 2-inch improved patent double-action pump, with air-valve fixed therein. ....	45 0 0
Copper Air Valve, with connecting piece and 1½ in. nut and wash, with lugs if required. ....	2 0 0

THE PRICES ARE SUBJECT TO 5 PER CENT. DISCOUNT FOR READY MONEY.

# PUMPS (For Deep Wells).

NO. 8.—BENHAM AND SONS' improved full-way, single, double, and triple-barrel Pumps are strongly recommended for all deep wells. They produce a larger quantity of water with less labour than pumps on the ordinary construction.

The great improvement in this pump consists in the water ways and valves being the same size as the barrel of the pump, rendering the working of it very easy. The valve or check is attached to a movable door, which will be found of the greatest utility and convenience in re-leathering and cleaning, obviating the necessity for removing the pump.

In situations where a large quantity of water is required from a great depth, and the means of working the engine limited, large pipes are recommended.

The following particulars will enable BENHAM AND SONS to recommend the most suitable pump and engine frame for the situation or purpose required, viz. :—

The depth of the well and the depth to the surface of the water.

The height the water is required to be raised above the top of the well.

The power used in working,—whether one or more men, or horse power.

The quantity of water required to be raised in a given time.

For water wheels and hydraulic rams,—the height of the fall of water, and the number of gallons of supply per minute.

Full water-way pumps (9-in. stroke), with doors to get at valves :—

Single.			Double.			Triple.		
	£	s. d.		£	s. d.		£	s. d.
2½-in. ....	9	10 0	2½-in. ....	15	10 0	2½-in. ....	23	0 0
3-in. ....	10	15 0	3-in. ....	17	10 0	3-in. ....	25	0 0
3½-in. ....	14	15 0	3½-in. ....	20	0 0	3½-in. ....	28	10 0
4-in. ....	16	0 0	4-in. ....	22	10 0	4-in. ....	32	10 0

The quantity of water which these pumps will raise per hour will be found at pages 182 and 184.

It is of importance that all deep well work should be fitted up with great truth and strength, for which purpose cast-iron stages and pulley guides, with clip to support the pipe, should be fixed every 12 feet.

THE PRICES ARE SUBJECT TO 5 PER CENT. DISCOUNT FOR READY MONEY.

## PUMPS.

No. 11. Cast-iron Engine Frame, with single crank, fly wheel and shifting balance weight, to be regulated according to the depth of well, divided lever for lengthening or shortening the stroke of the pump, and one handle for one man ..... £11 0 0  
 If with wrought-iron crank 18 5 0  
 Extra handle ..... 1 5 0

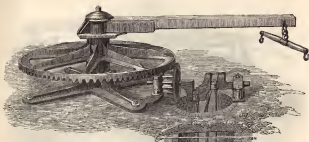

The above is suitable for raising water to the tops of buildings, from wells of 50 to 100 ft. in depth, by one man. One man working 30 revolutions per minute will discharge the following quantities of water, at the different altitudes, viz:—

Size of Pump.	Height raised, Feet.	Gals. per Hour.
3-inch .....	70 .....	300
2½-inch .....	100 .....	300

(The above does not include the cost of the Pumps, Stages, &c.)

THE PRICES ARE SUBJECT TO 5 PER CENT. DISCOUNT FOR READY MONEY.

## PUMPS.

No. 12. Cast-iron Horse Gear Frame, with wheel and platen, double cast-iron crank, slings and guides; may be worked by a small horse or donkey; for raising water by means of double or treble barrel pumps, out of wells from 50 to 100 feet.

With double cast-iron crank, slings and guides .....	£18 10 0
With double wrought-iron crank, slings and guides....	21 0 0
With treble cast-iron crank, slings and guides .....	22 10 0
With treble wrought-iron crank, slings and guides....	27 0 0
Pole, hook, and swingle-tree, extra .....	1 15 0

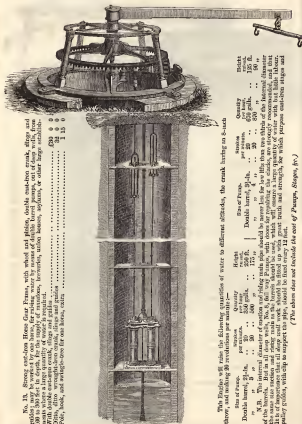

The quantity of water raised per hour will be the same as described in No. 13, page 200, if worked at the same speed, namely, 20 strokes per minute.

(The above does not include the cost of the Pump, Stages, &c.)

THE PRICES ARE SUBJECT TO 3 PER CENT. DISCOUNT FOR READY MONEY.

## PUMPS.

No. 15. Strong cast-iron Horse Gear Pumps, with wheel and piston, double cast-iron crank, slings and guides; may be worked by one horse, for raising water by means of double barrel pumps, out of deep wells, from 100 to 300 feet in depth, for the supply of manures, lawns, gardens, or other large establishments where a large quantity of water is required.

With double cast-iron crank, slings and guides ..... £30 0 0  
 With single cast-iron crank, slings and guides ..... 32 0 0  
 Pole, hook, and wattle-ree for one horse, extra ..... 1 15 0

This Engine will raise the following quantities of water to different elevations, the crank having an 8-inch throw, and making 30 revolutions per minute:—

Size of Pump.	Quantity per hour.	Height in feet.	Double barrel, 2 1/2 in.	Single barrel, 2 1/2 in.	Double barrel, 2 1/2 in.	Single barrel, 2 1/2 in.
Double barrel, 2 1/2 in.	30	250	20	20	20	20
" " " "	30	175	20	20	20	20

N.B. The internal diameter of piston and rising main pipe should be never less than two-thirds of the internal diameter of the barrels. But in all deep wells, No. 8, full size Pumps, with doors for regulating the slacks, are strongly recommended, and first the same size piston and rising main as the barrels should be used, which will ensure a large quantity of water with but little labour. It is of importance that all deep well work should be fitted up with great truth and strength, for which purpose cast-iron slings and pulley guides, with clip to support the pipe, should be fixed every 12 feet.

(The above does not include the cost of Pumps, Slings, &c.)

# PUMPS.

No. 3. Section of DEEP WELL and TREBLE-BARREL PUMP, worked by Horse-power.

This Engine, with a horse walking in a fourteen-foot track, at the rate of four miles an hour, will discharge the following quantities of water at different altitudes, making twenty-five strokes per minute.

	Height of Column, Feet.	Weight, lbs.	Quantity, Gallons, per hour.
Three 2½ in. barrels	500	525	550
„ 5 in. „	175	525	800
„ 3½ in. „	125	515	1100
„ 4 in. „	90	525	1440

By increasing the diameter of the track, the power will be augmented in proportion.

Improved Frame, with Treble Cast-iron Crank, Sings, and Guides.....£30 5 0

If with Treble Wrought-iron Crank ..... 37 10 0

Wood Pole, with Hook and Bolts and Nuts, with Swing-tree for one-horse, extra .... 1 15 0

(The above does not include the cost of the Pumps, Sings, &c.)

THE PRICES ARE SUBJECT TO 5 PER CENT. DISCOUNT FOR READY MONEY.

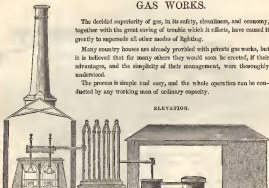

## GAS WORKS.

The decided superiority of gas, in its safety, cleanliness, and economy, together with the great saving of trouble which it effects, have caused it greatly to supersede all other modes of lighting.

Many country houses are already provided with private gas works, but it is believed that for many others they would soon be erected, if their advantages, and the simplicity of their management, were thoroughly understood.

The process is simple and easy, and the whole operation can be conducted by any working man of ordinary capacity.

ELEVATION.

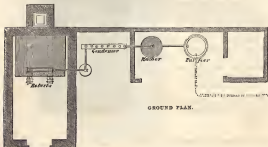

**EXPLANATION.** The coal from which the gas is to be produced is placed in the Retorts, to which sufficient heat is applied to drive off the gas.

The gas then passes up a stand-pipe from each Retort, and descends down a dip-pipe into the Hydraulic-main, the large horizontal pipe which is seen over the Retorts, and which is about half-filled with water and tar.

The Dip-pipes pass below the surface of the tar, through which the gas bubbles up into the space above, but cannot again return into the Retorts.

The gas is then passed through the Condenser, Washer, and Purifier, in order to be thoroughly separated from the ammonia, sulphuretted hydrogen, and carbonic acid, as well as from the remaining portion of tar, which has not already been received into the Hydraulic-main.

It then reaches the Gas-holder and is ready for use.

GROUND PLAN.

CHINESE GONGS,  
With French Polished Oak Stands.

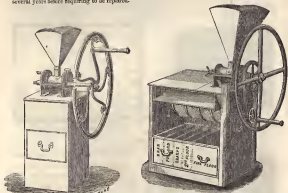

No. 1. 14-in. Gong and Stand, £3 15 0  
No. 2. 14-in. Gong and Stand, £5 5 0  
No. 3. 14-in. Gong and Stand, £3 15 0

Other sizes in proportion.

DOMESTIC FLOUR MILLS.

These Mills are portable, simply constructed, and easily worked. They grind and dress from one to three pecks per hour, according to the size, and their grinding parts being steel, they last several years before requiring to be repaired.

No. 1. To grind only,  
£3 15 0

No. 2. To grind 1 sort of flour besides bran, £8 10 0

## WROUGHT-IRON WINE BINS.

The Wrought-Iron Wine Bins are adapted (as shown below) either for brick arched vaults or cellars with flat ceilings, the mode of fixing in either case being so simple that they may be put up by any ordinary Workman; they combine great strength with lightness and economy of space, and their durability has been satisfactorily proved during more than forty years. The shelves are formed of plates of iron laid on bars, which rest on the cross bars of the lattice uprights, and are removable at pleasure. Plans and Estimates furnished, and Cellars fitted complete in any part of the Kingdom.

When an Estimate is required for fitting Cellars in the country, a rough plan should be forwarded.

## PRICES.

Lattice Uprights, in ones Large Bins, without shelves .....	1s. per foot super.
" " with extra cross-bars for shelves .....	1s. 3d. "
" " for single-tier Bins, with extra cross-bars for shelves .....	1s. 6d. "
Extra Standard Bars for Bins in centre of Cellar, about 2s. each.	
Shelves for single-tier Bins, i.e., 1ft. 4in. wide .....	3s. per foot run.
" double-tier Bins, i.e., 2ft. 8in. wide .....	4s. 6d. "
Fixing extra.	
Laths for blinding .....	Oak, 2s. 6d.; Prepared Deal, 2s. 8d. per hundred feet.
Blocks for back of bins .....	" " 3d. per foot.

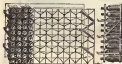

Wrought-Iron Wine Bins, as fitted for Centre Block in a Large Cellar.

Plan of Cellar, showing Side Bins and Centre Block.

Front View.

Side View. Fitted for Packing.

## NEW REGISTERED CELLULAR IRON BINS.

With Separate Rest for each Bottle.

These Bins will be found very useful: they are kept in stock in various sizes, from 1 to 20 dozen, or made to order any size or shape, to fit any space corner. They are particularly adapted for private cellars, as no laths are required, and the trouble of blinding is avoided. The bottles may be taken out or replaced by a cild without risk of breakage.

Price 3s. per dozen bottles.

# GAS WITHOUT HEAT, SMOKE OR SMELL

Ricketts's  
GLOBE

Ventilating  
LIGHTS

The following are some of the advantages of this mode of Lighting:—

- I. It carries off all the heat and foul air from the burner.
- II. It also ventilates the apartment by removing the heated and vitiated air.
- III. It introduces a constant supply of external fresh air.
- VI. The flame is powerful and steady, and cannot be affected by draughts.

V. No smoke escaping—the ceiling is not blackened.

With this arrangement Gas may now be introduced into Drawing Rooms, Dining Rooms, and Libraries, without any risk of damage to the Decorations, Furniture, Pictures, or Books; and the injurious effects on the Health are also entirely avoided.

Manufactured & sold by  
**BENHAM & SONS,**

19, 20 & 21, WICMORE STREET, LONDON. W.

WHERE THEY MAY BE SEEN IN OPERATION.
